Holy Wars

vim vs emacs vim
tabs vs spaces spaces

ABOUT ME

My name is Moshe, I love to code, from deployment scripts to database admin dashboards and mobile applications. In the last four and a half years, I worked at [Forter \(https://forter.com\)](https://forter.com) as a team member, team leader (data science and backend), and internal tools developer. I served in an enterprise SRE team of an elite branch in the 8200 alumni.

Whether you need a fast prototype of a product, speed up your CI environment or build an internal tool to boost your employee work, drop me a line and let's chat 😊

OPEN SOURCE PROJECTS

[Kipp - Secure Payments App \(https://github.com/ikimia/kipp\)](https://github.com/ikimia/kipp)  
Discontinued project
POC for a simple and secure payments app using One-Time-Code to initiate the transaction

[Elasticsearch Comrade \(https://github.com/moshe/elasticsearch-comrade\)](https://github.com/moshe/elasticsearch-comrade)   
Work in progress
Elasticsearch admin panel built for ops and monitoring

[Tomato Bot \(https://tomato-bot.com\)](https://tomato-bot.com)   
Gain faster feedback for your tests, in GitHub

[ElasticSearch Loader \(https://github.com/moshe/elasticsearch_loader\)](https://github.com/moshe/elasticsearch_loader)  
A tool for batch loading data files (json, parquet, csv, tsv) into ElasticSearch

[tplot \(https://github.com/moshe/tplot/\)](https://github.com/moshe/tplot/) 
Easy to use plotting tool for the terminal

TECHNICAL SKILLS

PYTHON ★★★★★
8 years of experience, mixed with production critical systems, web services, data ETLs, deployment and monitoring

ELASTICSEARCH ★★★★★
Managed several production clusters in different workloads. 1.5TB/day logs cluster, 20TB cluster for a real-time web app, query optimizations, write optimizations and more

VUEJS ★★★★★
Three years of experience of writing web applications using VueJs, including this CV page 😊

NODEJS ★★★★★
Good understanding of V8's event loop, writing backend services and performance optimizations at high-throughput low-latency systems

LINUX ★★★★★
Deep understanding and knowledge of the linux internals. several years of managing physical data center

AND MORE ... ★★★★★★
Docker, AWS, React Native, Jenkins, Riemann, Apache Spark, Machine Learning
